## Program Concept and Objectives:

DPDP Act compliance is crucial for Indian insurers because they handle vast amounts of sensitive personal data, making them prime targets for breaches, requiring explicit consent for processing, imposing strict security mandates (encryption, access control), granting policyholder rights (access, erasure), and linking compliance to cyber insurance benefits, all vital for maintaining trust, avoiding massive penalties, and aligning with global data governance standards.

With the recent notification of DPDP Act Rules,2025 , the clock started ticking for not just putting in place the necessary systems, processes for compliance to the tough requirements but also to make them functioning effectively by bringing about a cultural shift in the way Insurers do business. This requires extensive training to executives and employees on the spirit and specific provisions of the Act/Rules.

COI has created '**Virtual Training (CVT) Rooms**' to conduct this training program in a cost-effective manner for participants to equip themselves while being at their respective locations

## Key Takeaways from the program:

The program aims to deal with the salient provisions of DPDP Act and Rules with a focus on Compliance Obligations of the Insurance Companies and Intermediaries, namely

- Designing the Data Policy and implementation
- Data Protection Officer Appointment & Responsibilities
- Obtaining purpose driven clear consent for data processing.
- Implement reasonable security safeguards (encryption, access control).
- Appointing Data Processors with strict contractual obligations.
- Notifying the Data Protection Board and affected individuals of breaches.
- Manage Data Subject Rights (access, correction, erasure)

## Participant Profile:

This Program is designed for Junior to Middle level executives and those involved in different functions such as IT, Compliance, Risk, Distribution, Underwriting, HR
