

Virtual Training Session on New Vistas in Life Insurance Underwriting (CT-NVLI), Program ID- CPL10 (On 20th December 2023)

Life Insurance Underwriting has undergone a number of changes in the recent years. It has been tremendously enriched by the enabling role of digital technology, in eliciting deeper knowledge about customers, as well as by the strides taken by insurance medicine in recent years. At the same time, there are challenges arising from changing expectations of customers; the rise in insurance fraud and regulatory changes [like sec 45] which make it incumbent for insurers to apply due diligence and care at the time of selecting their risks. Finally there is the spectra of vulnerabilities arising in the wake of Environmental, Social and Governance risks that threaten long term sustainability of all insurers.

As the principal gatekeeper for all proposals for life insurance, the writer has to walk the tight rope between being too liberal and too conservative – there is the imperative to balance financial prudence with competitiveness of the life insurer. The purpose of the present program is to enable life insurance underwriters at various levels by providing tools and insights which not only highlight the deeper nuances of underwriting management but also an appreciation of some of the new trends that have emerged during the last one decade or more.

COI has created ‘**Virtual Training (CVT) Rooms**’ as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

Program Objectives:

Participants of the program would understand and get insights on:

- The changing context of wellness and disease and what this means for underwriters
