Insurance Institute of India, COI, Mumbai

Virtual Training Session on Cybersecurity, DPDP Compliance and Insurance Strategies (CVT) 15 December 2026

Program Concept and Objectives: **In an era of hyper-connectivity, the speed of business is matched only by the velocity of its threats. For the modern enterprise, data is no longer just an asset-it is a significant liability if left unprotected. The integration of technology into every facet of corporate operations has expanded the attack surface, making information security a non-negotiable pillar of the Enterprise Risk Management (ERM) framework.**

With the enforcement of the Digital Personal Data Protection (DPDP) Act, the stakes have shifted from mere operational disruption to massive legal and financial penalties. Organizations today face a dual challenge: maintaining robust Cyber Hygiene to prevent breaches and leveraging Cyber Liability Insurance to mitigate the fallout when they occur.

The College of Insurance has developed this specialized program to bridge the gap between technical security and financial risk transfer. This session provides a comprehensive 360-degree view of the cyber ecosystem, ensuring that risk managers, insurers, and intermediaries can navigate the complexities of data compromises and the subsequent claims landscape.

Program Objectives: Upon completion of this session, participants will be able to:

- **Evaluate the Cyber Threat Landscape: Analyze evolving attack vectors - from ransomware to social engineering-and their impact on business continuity.**
- **Operationalize Cyber Hygiene: Understand the interconnected roles of stakeholders in maintaining a "security-first" culture.**
- **Navigate the DPDP Act: Interpret the legal implications of the new data protection regime and its requirements for data fiduciaries.**
- **Master Cyber Insurance Mechanics: Decode policy structures, coverage triggers, and exclusions to ensure optimal risk transfer.**
- **Manage Cyber Claims: Develop an academic and practical understanding of the claims lifecycle following a data breach or system failure.**

Key Takeaways from the program:

Focus Area	Core Competency
Threat Intelligence	Identification of diverse cyber-attack methodologies and emerging digital risks.
Frameworks	Foundational knowledge of globally recognized Cyber Security frameworks (e.g., NIST, ISO).
Risk Mitigation	Strategic insights into the "Human Element" of Cyber Hygiene and internal controls.
Policy Analysis	Deep dive into Cyber Insurance clauses, including Third-Party Liability and First-Party Expenses.
Regulatory Compliance	Understanding the reporting mandates and penalties under the DPDP Act.

Participant Profile: **Insurance Executives, Intermediaries, Risk Managers& IT Leads, Compliance professionals.**

Program Fees: **Rs. 1770/-(₹ 1500/- plus 18% GST)**

Certificate of Participation: **Online Certificate in PDF format will be issued to all the participant.**

Program Coordinator: **Mr. Subash Pattanayak, Faculty, Email: pattanayak@iii.org.in, Contact: 022-69654204**

Program Date: 15 December | **Program Duration: 1 day (3hr-CVT)** | **Program Time (IST): 10.30 am to 01.30 pm**
