PROGRAM CONCEPT AND OBJECTIVES:

The insurance and reinsurance industry across the globe is increasingly aware of the devastating effects of natural catastrophes like earthquakes, tsunamis, floods etc. in different parts of the world. The impact of man-made disasters has also hit the sector badly in recent times. All these changes have made it important for all insurance practitioners to develop at least basic understanding of the concepts, emerging trends and practices relating to reinsurance business to maintain their relevance in the present day. This can help them in using reinsurance for effective risk management.

A better understanding of reinsurance helps insurance and reinsurance practitioners in seeking/ providing better terms to their customers. It would also help in faster claims settlements in case of any disastrous events.

Through this program, the College of Insurance aims to provide a stronger theoretical framework to insurers and others involved in designing reinsurance arrangements and implementing them.

KEY TAKEAWAYS FROM THE PROGRAM:

The program is designed to enable participants to:

- Revisit the fundamentals of reinsurance
