

“Health and Well-being for all” is part of the central vision of the Sustainable Development Goals which all UN Member States, including India, have agreed to achieve by the year 2030. Health Insurance is a major portfolio of the General Insurance Industry, and requires special attention, proper planning and implementation for proper management. Health Insurance Management includes various aspects such as prudent underwriting, claims management, customer management, hospital management, fraud management and TPA management. Guidelines framed by IRDAI also help in streamlining Health Insurance business.

Health Insurers have witnessed a step rise in fraudulent claims in recent years, causing losses to insurance companies and resulting in higher premiums for genuine customers. Today, Health Insurers need to collaborate with multiple stakeholders like hospitals, diagnostic agencies, pharmaceutical manufactures and others to reduce fraud.

COI has created ‘**Virtual Training (CVT) Rooms**’ as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

Program Objectives:

- Understand the relevance of Health Insurance Management
- Difference aspects of Health Insurance Management.
