Program Concept and Objectives:

With the omnipresence of technology in the business world, corporates have increased their speed of response. Simultaneously, the increased dependency and exposure to technology has brought in many new challenges for them and their customers. If data, the new oil on which industry is running, gets compromised, the entire organization can come to a stand-still position. Security of information and data has become one of the most important spokes of the Enterprise Risk Management wheel.

Many of the elements of Cyber security, Cyber resilience and Cyber liability are interconnected or overlapping. Hence understanding Cyber risk exposures and Cyber risk management becomes important for risk managers, providers of risk management solutions and practically everyone in the ecosystem. Though Cyber Liability insurances can cover many of the risks, to ensure that Cyber risks are efficiently and optimally covered, many of the stakeholders in the value chain need to be aware of Cyber risks and the Insurance Coverages.

In this context, College of Insurance has designed this program to provide academic and practical knowledge for professionals dealing with Cyber Security, Cyber Resilience and Cyber Insurance. The program will also deal with Cyber claims that an organization can face.

COI has created *'Virtual Training (CVT) Rooms'* as a cost- effective mechanism for participants to equip participants academically at their respective locations.

Key Takeaways of the program: The program is designed to empower participants in the following areas:

- Understanding the significance of Cyber threats and related challenges
- Awareness of various kinds of Cyber attacks
- Appreciating the roles of various parties in Cyber Resilience

- Understanding the basics of Cyber security framework
- Understanding the basics of Cyber insurance policy

Participant Profile: The Program is designed for executives of Life and General Insurance companies/ Intermediaries who have exposure to the insurance sector and have an interest in technology or cyber security.

Program Fees: ₹ 1770/-(₹ 1500/- plus 18% GST).
