**(From: 22<sup>th</sup> to 23<sup>rd</sup> June, 2023)**

---

**Relevance of the Program:-**

To avoid the worst impact of climate change, emissions need to be reduced by almost half by 2030, and reach Net Zero by 2050. In order to achieve this, India needs to cut down its dependence on fossil fuels (limited reserve) and invest in alternative sources of energy that are clean, accessible, affordable, sustainable and reliable.

Indian government plans to establish renewable energy of capacity 500 GW by 2030. As on 31st Dec 2022, the installed renewable energy capacity stood at 175 GW, of which solar comprised of 100 GW, Wind 60 GW, Bio-Power 10 GW and Hydro-power 5 GW. This sector is growing at over 30% per annum, very silently. Govt. incentivize to promote this sector.

So far only 4.5% of renewable energy potential has been explored in India leaving a large scope for the future to exploit at.

The above describes the importance of Renewable Energy Sector on Indian economy and on Indian Society. Non-Life Insurance players in India need to be equipped to manage the associated risks through appropriate insurance policies made available to this renewable energy sector having growing demands each year.

The above program of 2 days duration will impart knowledge in the relevant areas on “Management of Renewable Energy Insurance” taking in to account other sources of clean energy as well.

**Program Objectives:-**

It aims at making the participants aware of:

- Working of Hydro Power, Solar Power, Wind Power, Green Hydrogen and other sources of renewable energy as well as on the sources of clean energy
- Working of P&M, major equipment and its protection systems
- Typical breakdown, BI and other loss scenarios in those power plants
- Specific insurance coverage to protect the assets against fortuity
- Specialized knowledge on underwriting and claims procedures
