

Virtual Training Session on Understanding Electrical Vehicle Insurance Program ID – CPG14 (From 01st to 02nd June 2023)

There is a global thrust towards moving to cleaner energy and many Governments across the world are encouraging the manufacture and usage of Electric Vehicles as one of the solutions. India is not far behind in this movement towards reducing the use of fossil fuel and the Government variously supports the electric vehicle industry through subsidies and incentives.

Traditionally, the motor vehicle segment is one of the most popular line of business in retail insurance business. The introduction of electrical and autopilot vehicles has brought in new challenges in pricing and servicing Motor policies. As per industry experts, the knowledge and past experience of the Motor Insurance industry may not be sufficient to cater to the pricing and servicing of this growing segment. In this context, the College of Insurance aims to provide a general understanding to insurers and others involved in Motor Insurance about the challenges this change will bring to the industry.

COI has created '**Virtual Training (CVT) Rooms**' to conduct training program in a cost-effective manner for participants to equip themselves academically at their respective locations.

Programme Objectives:

The program is designed to provide insights to the participants in the following areas:

- Understanding the anatomy of Electric Vehicles
- Evaluating how Electric Vehicles will change the Motor Insurance landscape
- Appreciating the Autopilot mechanisms in Electric Vehicles from the Product Liability angle
- Appreciating the risk of Cyber-attacks on Electric Vehicles

Participant's Profile: Practitioners in Motor Insurance and related areas, working in the Marketing and Technical departments of General insurance companies.
