

Insurance Institute of India, COI, Mumbai

Virtual Training Program on

Fool proofing Cybersecurity (CVT) - 18 June, 2026

Program Concept and Objectives:

IRDAI Guidelines on Information and Cyber security envisage Insurers having a Policy on this aspect based on the principles such as Information Protection, User Authentication and Authorization, Accountability, Availability, Integrity, Trust, Continuity, Resilience and Regulatory Compliance. These elements, in short, cover holistically the entire gamut of Information & Cyber Security for Insurance entities.

However, in the recent past, the Insurance Sector has been witness to repeated instances of data breaches raising a specter of vulnerability and challenges associated with digitalization. Meanwhile, DPDP Act Rules have also been notified and the full scale compliance timeline has started ticking away with serious implications of crippling monetary penalties, business disruption and reputational loss for any policyholder data confidentiality failures.

Taking into account the imperative of Information and Cybersecurity for Insurance Sector, College of Insurance has designed a capsule course on Cyber security norms to be complied with. COI has created '**Virtual Training (CVT) Rooms**' to conduct training program in a cost-effective manner for participants to equip themselves academically at their respective locations.

Key Takeaways from the program:

The participants of the program will be given an overview of the Cyber security norms regulatory or otherwise and Cyber security Hygiene and Best practices. This would help improve the awareness and inculcate a data responsible culture in the Insurance entities.

Domain experts will discuss the relevant elements cyber security policy in the context of Regulatory norms of IRDAI and the Law of the land in this regard and Rules.
