

Insurance Institute of India, COI, Mumbai

Virtual Training Session on Motor Insurance : Focus Electric Vehicles (CVT)

22 June, 2026

Program Concept and Objectives:

Traditionally, the motor vehicle segment has been one of the most popular lines of business in Non-life insurance. While the line of business has been reasonably stable for years, the introduction of electrical and autopilot vehicles has brought in new challenges in pricing and servicing Motor policies in this particular segment. As the technologies involved are mostly new and upcoming, oftentimes even senior practitioners find it challenging to understand the nuances of insuring such vehicles and settling claims thereon.

In order to address the knowledge gap in the Motor Insurance Industry, impeding its ability to adequately serve this growing segment, the College of Insurance has designed this program to provide a general understanding to insurers and others involved in the insurance of electrical and autopilot vehicles.

COI has created '**Virtual Training (CVT) Rooms**' to conduct training programs in a cost-effective manner for participants to equip themselves academically at their respective locations.

Key Takeaways from the program:

This one-day program is designed to provide insights to the participants in the following areas:

- Appreciate the roles and functions of electrical vehicles in the Motor Insurance segment
- Familiarize themselves with electrical vehicle landscape
- Understand the anatomy of Electric Vehicles
- Evaluate how Electric Vehicles will change the Motor Insurance landscape
- Appreciate the newer challenges which will emerge while servicing this segment.

Participant Profile:

Practitioners in Motor Insurance and related areas, working in the Marketing and Technical (both underwriting and claims), Audit Departments of Non-Life Insurance companies.
