

Classroom Training Session on Fire Insurance Underwriting (CT) 24th - 25th July, 2025

Program Concept and Objectives:

Fire Insurance is one of the most popular products in the traditional general insurance industry. Ironically, it is - one of the most misunderstood products as well. Recently, new standard products have been introduced in this segment, but the entire scope of these products is not completely understood by many in the insurance industry. As huge assets, machineries and stock are being covered under Fire policies, it is very important to understand why underwriters seek certain information and how these bits of information become important in claims situations.

In this context, the College of Insurance aims to provide a stronger theoretical framework to insurers and others involved in Fire Insurance underwriting and others in this line of business.

Key Takeaways from the program: The program is intended to firm up the basics of Fire insurance professionals, make them comfortable in underwriting and claims settlement.

- Understanding of Fire underwriting of diverse types.
- Understanding the Standard Fire Insurance products
- Pre-acceptance risk evaluation
- Implications of various terms and wordings on claims settlement

Participant Profile: Junior and middle level officers dealing with fire/ property lines of insurance from insurance companies, brokers, corporate agents, surveyors and corporate customers of the insurance industry.
