

Virtual Training Session on Cyber Security, Resilience and Cyber Claims (CVT) 3 September, 2026

Program Concept and Objectives:

In the modern corporate landscape, technology is the primary driver of operational agility. However, as organizations become increasingly data-centric—treating data as the "oil" that fuels their engines—they also become more vulnerable. A single data compromise can paralyze an entire enterprise, making information security a critical spoke in the Enterprise Risk Management (ERM) wheel.

The boundaries between cyber security, operational resilience, and financial liability are increasingly blurred. For risk managers and insurance providers, understanding these overlapping exposures is no longer optional; it is a fundamental requirement. While Cyber Liability Insurance serves as a vital safety net, achieving optimal protection requires a holistic understanding of the entire value chain—from proactive hygiene to reactive claims management.

To address this need, the **College of Insurance (COI)** has developed this program to bridge the gap between technical cyber concepts and practical insurance applications. Delivered via our **College Virtual Training (CVT) Rooms**, this session offers a cost-effective, high-impact learning environment for professionals to master the complexities of the digital risk landscape.

Upon completion of this virtual session, participants will be able to:

- **Analyze the Cyber Threat Matrix:** Evaluate the evolving nature of digital threats and their systemic impact on business continuity.
- **Integrate Cyber Resilience:** Understand how various stakeholders contribute to an organization's ability to withstand and recover from digital disruptions.
- **Navigate Security Frameworks:** Gain foundational knowledge of the standards that govern data protection and information security.
- **Structure Cyber Insurance Solutions:** Master the core components of cyber policies to provide comprehensive coverage for diverse client needs.
- **Manage the Claims Lifecycle:** Understand the nuances of cyber-related claims, from initial forensic investigation to final settlement.

Key Takeaways from the program:

Module	Focus Area
Threat Intelligence	Identify common attack vectors (Ransomware, Phishing, DDoS) mechanics
Resilience Strategy	Defining the roles of IT, Legal, and Risk Management in a unified cyber defense.
Security Frameworks	Introduction to global standards (NIST, ISO 27001) that underpin insurable risks.
Policy Mechanics	Understanding First-Party losses vs. Third-Party liabilities and common exclusions.
Incident Response	Best practices for handling cyber claims and coordinating with forensic experts.

Participant Profile:

This program is specifically designed for: Insurance Executives, Intermediaries, Risk Management professionals & others interested.

Program Date: 3 September 2026

Program Duration: 1 day (CVT)

Program Time (IST): 10.30 AM to 01.30 PM

Program Coordinator: Mr. Subash Pattanayak Faculty,

Email: pattanayak@iii.org.in, Contact: 022-69654204

Program Fees: Rs. 1770/- (₹ 1500/- plus 18% GST)

Certificate of Participation: Online Certificate in PDF format will be issued to all the participants.

PROGRAM TEAM:

Ms. Yogeeta Kulkarni	Any help/queries mail to college_insurance@iii.org.in	022-69654255
Ms. Rupali Thakur		022-69654284
Ms. Sakshi Pawar		022-69654251
Mr. A. G. Madwal		022-69654254
Mr. P. H. Ekke		022-69654234
Ms. Akshara Nagpal		022-69654266
Ms. Meghana Shrivastava		022-69654249
Ms. Sneha Pednekar		022-69654270
Ms. Mrunal Satam		022-69654216
