

Virtual Training Session on Agriculture Insurance and Insurtech (CVT) 25th August, 2025

Program Concept and Objectives:

Agriculture insurance has been an essential tool in safeguarding farmers from the uncertainties of weather, crop failures, and other risks. With the introduction of Insurtech, the integration of technology into insurance operations has resulted in a major shift, particularly in agriculture insurance. Insurtech uses cutting-edge technology including as Artificial Intelligence (AI), blockchain, satellite imagery, and IoT to improve risk assessment, claim settlement, and policy administration.

This program explores the dynamic relationship between traditional agricultural insurance and Insurtech innovations, offering participants a comprehensive understanding of how technology is reshaping the agricultural insurance landscape. It aims to provide participants an overview of recent technologies adopted in Agriculture.

The '**Virtual Training (CVT) Rooms**' of the College of Insurance (COI) provide an innovative and cost-effective mechanism for participants to equip themselves academically at their respective locations.

Key Takeaways from the program: The program is designed to create awareness in the following areas:

- Digital Technology initiatives in India
- E-Nam (National Agriculture Market) portal for trading agriculture commodities
- National Land Records Modernization Program (NLRMP) for Digitizing Land Records
- Satellite based Remote Sensing Technology
- Artificial Intelligence and Machine Learning and Mobile Applications

Participant Profile: Professionals working with Insurance companies, Agriculture departments, Brokers, and third-party service providers. Individuals interested in building expertise in crop loss assessment and agriculture claims handling. Agriculture Surveyors and the Agriculture Students desirous of joining the profession.
