

**PROGRAM CONCEPT AND OBJECTIVES:**

In recent times, insurance companies as well as insured have become increasingly aware of the importance of risk management and are emphasising on the safety installations in the factories and the building complexes they insure. Property insurers are well aware of the importance of making the insured more focused on safety requirements. Risk engineers of insurance companies help to review, improve and even design risk management practices and early warning systems for customers by way of pre acceptance and post loss surveys.

In this context, College of Insurance (Col) aims to discuss the various techniques of risk inspection for risk engineers so that they can use the same for risk management, loss prevention and loss minimization in the property lines of business. Col has designed this program to help Risk Engineers and Officers dealing with Property Insurance to develop the skills which can be used during an inspection. They would also understand how insights from Risk Inspection will help underwriters in deciding whether to accept or reject a risk, in drawing up the terms and conditions of the policy, and in fixing risk commensurate rates.

COI has created '**Virtual Training (CVT) Rooms**' to conduct training program in a cost-effective manner for participants to equip themselves academically at their respective locations.

**KEY TAKEAWAYS FROM THE PROGRAM:**

The program is design to empower the participants in the following areas:

- Understanding different industries and risk exposures involved
- Understanding the importance of safety measures
- Appreciating the need of hazard studies
- Appreciating the importance of conducting effective risk inspections
- Appreciating the importance of writing comprehensive risk inspection reports

**PARTICIPANT PROFILE:**

Junior and middle level officers dealing with fire/ property lines of insurance from insurance companies, brokers, corporate agents, surveyors and corporate customers of the insurance industry.

**PROGRAM DURATION:** 2 days (CVT)
