Insurance Institute of India, COI, Mumbai

Classroom Training Session on Cattle Insurance, Live Stock and Pet Insurance and other forms of Rural Insurance (CT) - 10 to 11 September, 2026

Program Concept and Objectives:

The Indian insurance industry has been implementing different Insurance schemes for cattle, livestock, poultry, fishes, honeybees etc. for a long period. Rural insurance involves multiple stakeholders, including State Governments, insurance companies, financial institutions, farmers and others.

There are several concerns regarding risk coverages and underwriting considerations in this segment. Insurance schemes are promoted and subsidized by the Central and State Governments and insurance companies to typically cover death and disablement due to diseases and accidents. Specific underwriting guidelines are framed depending upon the type of animals covered. Cattle and livestock assets may be financed from financial institutions.

There can be various challenges in underwriting rural insurance for example if insurance is done on market value basis, the fair assessment and settlement of claims can be a challenge. Various technologies are being used for easy implementation of cattle and other rural insurances in India and abroad.

Poultry, duck, fish-in-pond, horse, camel, elephant, honeybee, brackish water fish, hydroponics, mariculture, apiculture and sericulture are other forms of Rural Insurance, which can increase premium volume of the rural portfolio.

In this context, the College of Insurance has designed a two-day classroom training programme to provide a strong understanding of cattle and livestock insurance for practitioners and employees of the insurance industry.

Key Takeaways from the program:

The Two-day session is designed to discuss:

- Operational modalities of Cattle and Livestock Insurance schemes
- Assessment of Claims
- Use of Technology in Cattle Insurance
- Other Rural insurances

Participant Profile:

Executives working in Rural and Agriculture departments in Insurance companies, practicing and aspiring Agriculture Surveyors, product developers, agriculture students, brokers and agents.
