FL-81

FELLOWSHIP EXAMINATION
MATHEMATICAL BASIS OF LIFE ASSURANCE

Time: 3 Hours] [Total Marks: 100

Answer any FIVE questions only.
All questions carry 20 marks each.

Marks 5 each

1. a) Given that: \( Ax = 0.3801 \) and \( Px = 0.0211 \)

Find:- \( a_x \) and the rate of interest.

b) What is mortality surplus?

How does it arise?

Give expression for mortality surplus.

c) Prove:- for endowment assurance policy

\[
P_x : \overline{n} = P_{x : \overline{n}} + P_x : \overline{n}
\]

d) A person now aged 30 has a Whole Life Assurance Policy for Rs. 15,000 issued to him 10 years ago. He now desires the policy to be altered to an Endowment Assurance policy for the same sum assured maturing at age 60. Find the net annual premium he has now to pay. The basis is LIC (1970 - 73). Ultimate mortality with 6% interest.

\[
\dd{a}_{30} = 15.618 ; \quad \dd{a}_{20} = 16.371 ;
\]

\[
A_{30 : 30} = 0.19852; \quad \dd{a}_{30 : 30} = 14.160
\]

2. On the basis of the LIC (1970-73) Ultimate Table at 6%, calculate the net annual premiums for a sum assured of Rs.1000 for the following assurances for a life aged 30.

5 each

a) Whole Life Assurance.

b) Whole Life Assurance, premiums limited to 20 years.

c) Endowment Assurance for 25 years.

d) Endowment Assurance for 25 years. Premiums limited to 15 years.

Given: \( M_{30} = 19801.59 \) \( M_{55} = 12716.28 \) \( N_{30} = 2666994.53 \)

\( N_{45} = 927313.11 \) \( N_{50} = 623195.21 \) \( D_{55} = 35573.26 \)

\( N_{55} = 403807.17 \)
3. a) The following particulars are given:

<table>
<thead>
<tr>
<th>x (age)</th>
<th>25</th>
<th>26</th>
<th>27</th>
<th>28</th>
<th>29</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>l_x</td>
<td>97,380</td>
<td>97,088</td>
<td>96,794</td>
<td>96,496</td>
<td>96,194</td>
<td>95,887</td>
</tr>
<tr>
<td>d_x</td>
<td>292</td>
<td>294</td>
<td>298</td>
<td>302</td>
<td>307</td>
<td>313</td>
</tr>
</tbody>
</table>

\[ \text{interest} = 6\% \]

i) Workout commutation functions for ages 25 to 30.

ii) Calculate level annual premium:

a) \( P_{25}^{\frac{1}{2}} \)

b) \( P_{25}^{\frac{1}{4}} \)

c) \( P_{27}^{\frac{1}{3}} \)

b) The values of \( A_x \) on 3% interest basis are given below for a specified age range:

<table>
<thead>
<tr>
<th>x</th>
<th>( A_x )</th>
</tr>
</thead>
<tbody>
<tr>
<td>35</td>
<td>0.429</td>
</tr>
<tr>
<td>36</td>
<td>0.437</td>
</tr>
<tr>
<td>37</td>
<td>0.445</td>
</tr>
<tr>
<td>38</td>
<td>0.453</td>
</tr>
<tr>
<td>39</td>
<td>0.462</td>
</tr>
</tbody>
</table>

Calculate in a tabular form the values of \( a_x \) for all ages 35 to 39 to three decimal places.

4. a) Calculate office annual premium for an Endowment Assurance for 10 each Rs. 15,000 to a person aged 35 for 25 years. Provide for first year expenses at 50% of premiums and 15% Sum Assured and Renewal Expenses of 5% of premiums and 6% Sum Assured.

b) Calculate office premium (annual) for a With Profit Endowment Assurance by providing a bonus loading of 20% Sum assured per annum.

\[ \overline{a}_{35:25} = 13.086 \quad A_{35:25} = 0.25931 \]

\( \left( \begin{array}{cc} D_{35} & = 12664.23 \quad R_{35} = 516333.68 \quad R_{60} = 132156.08 \\ M_{60} & = 10506.87 \quad D_{60} = 24604.43 \end{array} \right) \)
5. On 1st January 1979, an Office issued a number of annual premium without profit policies to a group of lives each of whom was then aged 35. All the policies were for a term of 20 years and were of the following types:
Endowment Assurances under which the sum assured was payable on survival to the end of the term or on previous death.
Temporary Assurances under which the sum assured was payable only on death within the policy term.
Calculate the profit or loss from mortality for the calendar year 1988 in respect of the policies issued to this group of lives given the following data:

<table>
<thead>
<tr>
<th>Type of Policy</th>
<th>Sums. Assured existing on 31st December 1988</th>
<th>Sums Assured discontinued by death during 1988</th>
</tr>
</thead>
<tbody>
<tr>
<td>Endowment Assurance</td>
<td>Rs. 27,00,000</td>
<td>Rs. 17,000</td>
</tr>
<tr>
<td>Temporary Assurance</td>
<td>Rs. 15,40,000</td>
<td>Rs. 4,000</td>
</tr>
</tbody>
</table>

Basis: LIC (1970-73) Ultimate Table and 6% interest

Assume that there is no source of decrement other than death and that all claims are paid at the end of the year of death.

Given: \( q_{44} = 0.00420 \)
\[ \ddot{a}_{45:10} = 7.612 \]
\[ \ddot{a}_{35:20} = 11.864 \]
\[ A_{45:10} = 0.05190 \]
\[ P_{35:20}^{1} = 0.00401 \]

6. i) A whole life insurance of Rs.1000 is purchased on a life aged 80. The death benefits are payable at the end of the year of death. Mortality follows a select table with a one-year select period and the following values are provided:
\[ q_{80} = 0.5 \times q_{80} \]
\[ A_{80} = 0.67980 \]
\[ A_{81} = 0.68952 \]
\[ q_{80} = 0.1 \]
Calculate the value of \( 1000 \times A_{80} \) for an interest rate of \( i = 0.06 \)

ii) An individual aged 25 takes a pension policy with a term of 30 years. The policy requires payment of annual premiums in advance for two thirds of the policy term. On death, 10 times the annual premium is paid. On survival to the end of the term, a pension of Rs. 12,000 per quarter is paid in advance until the death of the policy holder. After vesting of pension no death benefit is paid.
Assumptions: Interest: 4% p.a  Ignore expenses;
Calculate the annual premium under the policy

Given: \( \dd_{25} = 22.520 \)  \( \dd^{(4)}_{35} = 16.989 \)  \( D_{45}/D_{25} = 0.4494 \)
\( D_{55}/D_{25} = 0.29606 \)  \( A_{25} = 0.13886 \)  \( A_{55} = 0.3895 \)

7. i) A life insurance company has sold 1000 single premium endowment assurance policies to lives aged 30 for a policy term of 20 years and sum assured of Rs. 100,000 each. If the Company expects that 2 lives will die each year and it will earn an interest rate of 5% per annum, calculate the single premium. Assume that the Company incurs expense of 5% of the single premium only at the time of policy issue and death claims are paid at the end of the year.

Given: \( v^{20} = 0.37689 \)

ii) a) A person now aged 30 has a Whole Life Assurance Policy for Rs. 15,000 issued to him 10 years ago. He now desires the policy to be altered to an Endowment Assurance Policy for the same sum assured maturing at age 60. Find the net annual premium he has now to pay. The basis is LIC (1970-73) Ultimate mortality with 6% p. a. interest.

b) In the data above, if the policyholder desires reduction in sum assured, keeping the premium payable as per the original contract unaltered, calculate the reduced sum assured.

Given: \( \dd_{20} = 16.371 \)  \( \dd_{30} = 15.618 \)  \( A_{30:30} = .19852 \)
\( \dd_{30:30} = 14.160 \)  \( A_{20} = .07334 \)

8. i) Explain valuation of Non-standard Plans.

ii) What is meant by renewal expense ratio of an insurer?
Discuss the relationship of this ratio with the provision for expenses in a gross premium valuation.

iii) A sub-standard life aged 40 effects an Endowment Assurance for Rs. 10,000 for a term of 25 years. The office has decided to accept the risk by charging extra premium calculated on basis of rating up of age by 5 years for first 6 years, by 3 years for next 8 years and by 2 years thereafter. Calculate extra annual premium. Basis LIC (1970-73) Ignore Exp.
Given: \( P_{40:25} = 0.02148 \); \( \bar{a}_{45} = 5.148 \);
\( \bar{a}_{49} = 6.405 \); \( \bar{a}_{56} = 7.715 \);
\( D_{51} = 46739.97 \); \( D_{45} = 68774.85 \);
\( D_{57} = 30829.16 \); \( D_{49} = 53297.64 \)

---END---
FELLOWSHIP EXAMINATION

STATISTICS

Time: 3 Hours] [Total Marks : 100

Answer any FIVE questions only.
All questions carry 20 marks each.

(An extract from the table of areas of the standard normal curve
between o and x is given at the end)

Marks
1. The scores of candidates who appeared for certain test are normally distributed
with mean 55 marks and standard deviation 15 marks. Minimum score for
passing is 34 marks and second class is awarded to students with scores between
46 and 61 marks. Minimum marks required for distinction is 70. If 10000
students appeared, find :
a) Probability that a candidate selected at random scores at most 40 marks.
b) Percentage of candidates who passed
b) Number of candidates passing in Second Class.
d) Number of Candidates scoring distinction.

5 each

2. Write short notes on :
 a) Negative Correlation
 b) Spurious Correlation
 c) Cluster Sampling
 d) Judgment Sampling

5 each

3. a) Fifteen Agency Managers are selected at random from 2 regions. Northern
and Western, of a Life Assurance Company. The Agents recruited by the
15 Agency Managers are as shown below :

<table>
<thead>
<tr>
<th>Agency Manager</th>
<th>Northern Region</th>
<th>Western Region</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>98</td>
<td>39</td>
</tr>
<tr>
<td>2.</td>
<td>34</td>
<td>33</td>
</tr>
<tr>
<td>3.</td>
<td>94</td>
<td>54</td>
</tr>
<tr>
<td>5.</td>
<td>77</td>
<td>31</td>
</tr>
<tr>
<td>6.</td>
<td>40</td>
<td>55</td>
</tr>
</tbody>
</table>
Can it be concluded that the difference in Agency recruitment capacity of the Agency Managers of the two regions is significant?

b) There are two underwriters X and Y, working in a New Business section of a Branch Office of a Life Assurance Company. Underwriter X underwrites, on an average, 12 new business proposals per hour, whereas, underwriter Y underwrites, on an average, 8 new business proposals per hour. Moreover, it has also been experienced that, on an average 8% of the new business proposals underwritten by underwriter X results into early claims, and 12% of the new business proposals underwritten by underwriter Y results into early claims.

i) What is the overall probability of a new business proposal being resulted into early claim?

ii) If a new business proposal, selected at random, is found to be resulted into early claim, what is the probability that it was underwritten by underwriter Y?

4. a) A Company is interested in knowing if there is significant difference in the average salary received by foremen in two divisions. It is believed that the salaries of the foremen are approximately normally distributed with Standard deviations approximately same. Based on the sample data from the two divisions, following observations were made.

<table>
<thead>
<tr>
<th>Sample size</th>
<th>12 foremen</th>
<th>10 foremen</th>
</tr>
</thead>
<tbody>
<tr>
<td>First division</td>
<td>1050</td>
<td>980</td>
</tr>
<tr>
<td>Second division</td>
<td>68</td>
<td>74</td>
</tr>
</tbody>
</table>
If you are a Statistician in this company what will be your conclusion, at 5% level of significance?
Write clearly the Hypothesis you are testing.
(Given :- \( t_{0.05} = 2.086 \) at 20 d. f.)

b) A sample of 50 typical round trips of a truck in a transport company showed mean time of a trip 52 hours with a standard deviation 4 hours. Find the limits within which population mean of round trip lies almost certainly.

5. A Life Assurance Company opens five satellite offices (Extension counters) in the developing residential areas of a city. It also deploys specially trained Agency Managers to perform in these offices. The Annualised premium (Rupees, crores) procured by these satellite offices, through these Agency Managers, in a Financial Year, is given below:

| AGENCY MANAGERS |
|-----------------|-------|-------|-------|-------|-------|-------|
| Satellite Offices | A    | B    | C    | D    | E    | Total |
| 1                | 29   | 1    | 56   | 16   | 16   | 118   |
| 2                | 97   | 60   | 57   | 67   | 96   | 377   |
| 3                | 75   | 36   | 66   | 38   | 14   | 229   |
| 4                | 24   | 63   | 50   | 71   | 34   | 242   |
| 5                | 12   | 20   | 88   | 7    | 65   | 192   |
| Total            | 237  | 180  | 317  | 199  | 225  | 1,158 |

Determine the effect of the areas of satellite office and the effectiveness of Agency Managers on the procured annualized premium.

6. Twenty life assurance policies are chosen at random from among the policies issued by a Branch Office of a Life Assurance Company. The 'Age at Entry' under these policies are found to be:

\[
\begin{array}{cccccccccc}
35 & 30 & 43 & 46 & 43 & 29 & 36 & 37 & 40 & 34 \\
48 & 30 & 28 & 45 & 25 & 39 & 41 & 24 & 33 & 25
\end{array}
\]

Calculate average age at entry and variance in age at entry.
Also, determine the 90%, 95% and 99% confidence limits for the variance in age at entry of all the policies issued by the Branch Office.
7. Calculate 5 yearly and 7 yearly moving average for the data given below. Also calculate respective seasonal indices.

<table>
<thead>
<tr>
<th>Year</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
<th>10</th>
</tr>
</thead>
<tbody>
<tr>
<td>Observed Value</td>
<td>220</td>
<td>208</td>
<td>156</td>
<td>210</td>
<td>218</td>
<td>240</td>
<td>230</td>
<td>220</td>
<td>228</td>
<td>244</td>
</tr>
<tr>
<td>Year</td>
<td>11</td>
<td>12</td>
<td>13</td>
<td>14</td>
<td>15</td>
<td>16</td>
<td>17</td>

<td>312</td>
</tr>
</tbody>
</table>

8. (i) Prices paid and quantities consumed for groceries, vegetables, milk, cloth and cosmetics for the years - 2005 and 2010 are given below. Calculate :-

   i) Price Index using base year (2005) quantities as weights.
   iii) Quantity Index using Base year (2005) prices as weights.
   iv) Quantity Index using current year (2010) prices as weights.
   v) Value Index.

<table>
<thead>
<tr>
<th>Commodity</th>

------ END ------
FELLOWSHIP EXAMINATION
GROUP INSURANCE & RETIREMENT BENEFIT SCHEMES

Time: 3 Hours] [Total Marks : 100

Answer any FIVE questions only.
All questions carry 20 marks each.

1. Write short notes on: (Any four)
   a) Irrevocable Trust
   b) Past service liability under Gratuity & Superannuation Schemes
   c) Group Selection and Group underwriting
   d) Insurable Interest under Group Schemes
   e) Why is defined benefit pension scheme losing its appeal.

   Marks 5 each

2. 'Swati' Textiles has got insured superannuation Scheme with your insurance Company. The company has submitted claims under following members. As a group schemes manager how you will deal with these claims.
   a) An employee (Membership No. 107) resigned and joined the company where there is no insured superannuation scheme.
   b) An employee (Membership No. 111) resigned and joined the new company where there is insured superannuation scheme of your insurance company.
   c) An employee (Membership No. 113) voluntarily retired 3 yrs. prior to regular superannuation date.
   d) An employee (Membership No. 115) who has already attained his superannuation age, but his employer has granted extension of 3 yrs. and his company also desire to pay contribution against him during extended service.

   Marks 5 each

3. a) List out the retirement benefits usually provided by an employer to employee in India at present and explore according to you what more new benefits can be added?
   b) Why and how Government encourages employers and employees for starting and continuing retirement benefit schemes?

   Marks 10 each
4. a) State main methods available to employer for arranging for pension schemes for payment of pension to their employees? Compare advantages and disadvantages of each scheme, out of these Schemes which Scheme you will choose and why?

b) State the Income tax position indicating relevant sections of Income-Tax Act, 1961
   i) Pension to employee
   ii) Pension to widow
   iii) Commuted value
   iv) Employees contribution to approved Superannuation Fund
   v) Interest on Superannuation Fund from the point of Fund.

5. a) "The hazard of premature death of the bread winner will cause sudden stoppage of income to the family. On the other hand living too long in old age after retirement is equally dreadful." Elucidate the statement. Suggest how to combat these economic insecurities.

b) What are the main factors which contributed to the rapid growth of superannuation schemes?

6. Of late there is massive T.V. and News Paper Advertisements from the Government of India High Lighting measures undertaken to elevate people below poverty line. Name any three such measures recently introduced by the Government in this regard and discuss salient features of any one of them.

7. Explain the merits and demerits of single and annual premium basis of costing under Group Superannuation Schemes. Also enumerate as to how a reasonable benefit can be provided to the widow and children of the deceased employee, in the event of premature death of the employee.

8. In Group Insurance Schemes the general practice is to charge an average premium for every member. Discuss its merits, while elucidating the impact of experiences rating adjustment under such cases.

----- END -----
FELLOWSHIP EXAMINATION
REINSURANCE

Time: 3 Hours] [Total Marks : 100

Answer any FIVE questions only.
All questions carry 20 marks each.

1. Distinguish between:
   a) Treaty and facultative methods of Reinsurance
   b) Claims control and claims co-operation
   c) Hard and Soft markets
   d) Written and Earned premium.

   Marks 5 each

2. Discuss:
   a) Cut through clause
   b) Clean cut method of RI accounting
   c) Line
   d) Securitisation

   5 each

3. a) The reinsurance scenario in India Post Liberalization has seen a special role of the National Reinsurer – GIC Re. Comment.
   b) Differentiate between “Accounting Year Basis” and “Underwriting Year Basis” in Reinsurance Accounting.

   10 each

4. a) Discuss the crucial role of reinsurance in addressing the limitations to the law of large numbers, preserving the income from investment and insulating shareholders’ funds from unpredictable loss scenarios.
   b) Explain the need for reinstatement provisions under excess of Loss Treaties.

   10 each

5. What are the objectives and considerations while designing a reinsurance programme.

   20

6. Prepare 1st Quarter, 2010 Reinsurance Account for First Surplus Fire Treaty from the following data:

   ₹

   Premium – 50,000
   Portfolio Entry –
<table>
<thead>
<tr>
<th>Description</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Premium</td>
<td>60,000</td>
</tr>
<tr>
<td>Loss</td>
<td>30,000</td>
</tr>
<tr>
<td>Commission</td>
<td>40%</td>
</tr>
<tr>

<td>1,500</td>
</tr>
<tr>
<td>Common a/c XL Premium</td>
<td>1%</td>
</tr>
<tr>
<td>Claims Paid</td>
<td>30,000</td>
</tr>
<tr>
<td>Common a/c XL recovery</td>
<td>10,000</td>
</tr>
<tr>
<td>Premium Reserve retained</td>
<td>40%</td>
</tr>
<tr>
<td>Premium Reserve released</td>
<td>15,000</td>
</tr>
<tr>
<td>Interest on Premium Reserve</td>
<td>300</td>
</tr>
<tr>
<td>Tax deducted on interest</td>
<td>30</td>
</tr>
<tr>
<td>Credit for cash loss paid</td>
<td>5,000</td>
</tr>
<tr>
<td>Reinsurance Share</td>
<td>1%</td>
</tr>
</tbody>
</table>

7. Discuss Reinsurance after liberalization of Insurance industry in India.

----- END -----
FELLOWSHIP EXAMINATION
RISK MANAGEMENT

Time: 3 Hours]

Answer any FIVE questions only.
All questions carry 20 marks each.

1. Write short notes on:
   a) Phases of Disaster.
   b) Goals of Finite Risk Reinsurance
   c) Law of Large numbers
   d) 3 fold approach to manage risks.

2. Write short notes on the following:
   a) Insurance & ERM
   b) Components of ERM
   c) Briefly comment on the legal issues which were prevalent before and later influenced by the Bhopal Gas Tragedy.
   d) Describe BCP with Suitable examples.

3. a) What is meant by “Cost of Risk”? Explain the variables on which costs of Risks are dependent and provide suitable examples.
   b) What are the basic components of a Risk Management Process? How does such a process aid any business enterprise?

4. a) What factors weigh in deciding risk management process objectives?
   b) Mention at least ten duties of a risk Manager.

5. Provide a detailed example of how you would build up on appropriate Risk Management Programme assuring you are the Head of Risk management of your organization.

6. Explain the key considerations to be employed while formulating and recommending a "Risk Retention and Transfer Strategy" for an enterprise. How will you select, implement and monitor the best technique out of various possible alterations?
7. Management of ABC Ltd. wishes to know the method of valuing an owner's direct property loss exposure. Elaborate and state which ones are preferred for risk management purposes.

8. MPT Ltd. is a tiles producing company with a labour force of 250. The management has asked the Risk Manager to evaluate the security and safety features in the factory from workers point of view. Elaborate the points that would be covered.

------ END ------
FELLOWSHIP EXAMINATION

LAW AND ECONOMICS OF INSURANCE

Time: 3 Hours

[Total Marks : 100]

Attempt at least 2 questions each from Section 'A' and Section 'B'.

Total Questions to be attempted are 5 only.

All questions carry 20 marks each.

Section - 'A'
